Otters Love to Play and Move!

After reading *Otters Love to Play* and watching several videos of otters we brainstormed as a class what we learned about the lives of otters. We also brainstormed a list of verbs that describe how they move. Now write what you learned about otters. How do their lives change throughout the seasons? How do they move? How do they care for their pups? How do they learn to swim? What do they eat? What are their predators? Describe several ways that they play. Write at least seven sentences about otters, using the lists we brainstormed as a class to help you.
